# Canadian Police Information Centre (CPIC)/Warrant Policy

---

## **Purpose:**

To act as a centralized “front-line” information and service center, providing 24-hour operational support through the sharing, access, and control of computer-based information and court documentation.

## **Statement of Principle:**

All access, input, inquiry, and the use of information systems, including CPIC; must be for a law enforcement purpose, and not for personal reasons. The security of EPS information systems, including external systems to which the EPS subscribes, is the responsibility of all members.

## **Policy Statement:**

EPS members must be able to clearly articulate the law enforcement purpose any time any information system is used and may be required to provide the law enforcement purpose for a future query.
